

Decal Installation Guide

The FSRA decal is a double-sided vinyl decal that is provided to credit unions that informs the public that the deposits at the credit union are insured through FSRA.

The decal should be displayed prominently at credit union entrances used by the public or a window beside that entrance in a manner visible from the outside. Below are instructions to guide you in displaying the decal.

Location

1. The decal should be placed approximately at eye level on any door or entrance used by the public to enter the branch.
2. The decal should be clearly visible and easily readable when the door is open.
3. The decal should not be overcrowded with other signs or advertisements.

Applying the Decal

The decal is designed to go on the inside of a door or window facing outwards and is readable from both sides.

1. Clean the surface thoroughly to ensure application is successful.
2. Peel the decal away from the backing paper.
3. Position the decal and press onto surface.
4. Once the decal is in position, push out any trapped air working from the centre to the edges.
5. If you need to reposition the decal, gently remove it and start again.
